

# Houston International Airport Houston, TX

## BHS Operation, Maintenance and Repair Services

### Program Summary

After evaluating submitted proposals for best value, Houston Airport Systems selected JSM Airport Services as their BHS operations, maintenance and repair service provider. Due to COVID impacts, JSM was tasked with securing qualified personnel and beginning operations in just two (2) weeks after contract award.

JSM was tasked to evaluate the existing equipment and perform corrective measures to bring the components back to OEM standards. JSM implemented FIIX®, a maintenance program platform (CMMS) to effectively manage the more than 5000 BHS assets at IAH. JSM's O&M services include the maintenance of three (3) EDS matrices and 1350 assets (terminals A, D & E) in support of the baggage screening operation.

### Program Highlights

- ✓ Ensuring the continuance of the manufacturer's warranty of the baggage handling system
- ✓ Providing the client with a customized, Computerized Maintenance Management System
- ✓ Daily, weekly, monthly scheduled services, from which the operators benefit from a clean, safe, and functional BHS
- ✓ Monthly safety and functionality checks on all systems
- ✓ Providing 24-hour 7-day a week experienced, reliable, factory and OSHA trained technicians
- ✓ Providing additional in-house services with our broad range of BHS specialists that HAS would otherwise have to solicit from outside suppliers at a much higher rate
